

## **KOREA APPROVES GM CORN STACKS FOR IMPORTATION**

The Korean Regulatory Authorities have approved the importation of Syngenta's biotech corn Agrisure Viptera 3110 and 3220 trait stacks for food and feed use within Korea. The two stacked traits offer a broad spectrum of above-ground lepidopteran insects such as the European corn borer and corn earworm. The same stacked traits have been given import approval from regulatory authorities in the [Philippines](#), Japan, [Mexico](#), [South Africa](#), and Taiwan, and cultivation approval in the United States and Canada.
